

Photography sessions

We have a wealth of experience of working with public service and education clients, photographing on their premises.

The success of these sessions relies on:

An organised schedule with staff knowing in advance that a shoot is taking place.

Allow 20 to 30 mins per subject area depending on complexity of activity.

Logical route around premises to maximise effectiveness.

Make allowance for the British weather.

A pre determined knowledge and expectation with regard to dress/make-up/jewellery code - our photographer will question anything that he thinks isn't right.

Awareness of who the pupils are in the photos taken.

Written permission should be sought from parents/carers/members of the public, before/after photo shoot, prior to publication.

Where the school uniform is dark, bright props will add to the photograph and create a happier image.

Availability of suitable props in specialist areas - it is not necessary to go to a lot of effort setting things up, our photographer has a great deal of experience in creating an exciting photo.

Our photographer is CRB checked.
